

**New!**

## 356/912 Oil Cooler from Airflow Systems

- 44% LIGHTER THAN STOCK COOLER
- MORE AIR TO CYLINDERS 3 & 4
- LESS OIL PRESSURE DROP
- TIG WELDED
- MADE IN THE U.S.A.
- INDIVIDUALLY PRESSURE TESTED

Airflow Systems has applied 15 years of high performance aircraft heat exchanger design experience to its new Porsche® 356/912 oil cooler.

Proprietary software was used to obtain the optimum balance between maximum oil cooling with minimum oil pressure loss and improved air flow to cylinders number 3 and 4. By utilizing the latest in heat transfer fin design, the Airflow Systems oil cooler allows more air to pass through the cooler which promotes even cylinder temperatures while maintaining stock appearance.

High quality construction to aircraft standards incorporates a Quality Control program that includes pressure testing of each cooler prior to shipment.

Available from Porsche® high-performance parts dealers. Please go to [www.airflow-systems.com](http://www.airflow-systems.com) for the dealer nearest you.

# Only \$495 ea.
